

Sign Language Recognition

Why we chose this topic?

- Speech is the most common technique of communication
- Dumb people are the most impacted
- Sign language is used for conveying their thoughts to others

Data

- Training samples: 27455 images
- Testing samples: 7172 images
- Image dimension: 28 x 28 (784 pixels)
- Grayscale images
- Data source: Kaggle

Breaking it down

Some Examples

Preprocessing

- Rotation
- Blurring
- Normalization
- Zoom
- Flipping

Validation Scheme

Training

Testing data

Training (0.8)

Validation (0.2)

Scoring Metric

Modeling the Data

- Decision Tree
- XGBoost
- CatBoost
- ANN
- CNN

Results!

Model	Accuracy (%)	Time
Decision Tree	44.3	150 s
XGBoost	77.1	90 s
CatBoost	81.8	93 s
ANN	66.0	70 s
CNN	98.8	100 s
